The Kaveri River (Kaveri), which rises at Kalakudi on the eastern side of the Western Ghats, and with its tributaries, drains the greater part of Kodagu. In the rainy season, particularly the southwest monsoon from June to the end of September, the river flows with violence and great rapidity. In July and August, the rainfall is high, and the month of November is often showery. The yearly rainfall may exceed 4,000 mm, in the dense jungle tract, it reaches 8,000 to 9,000 mm. In the scrubby areas in the west it reaches from 1,500 to 2,500 mm. Kodagu has an average temperature of about 19 °C, the extremes being 11 °C and 29 °C. The hottest season is during April and May. The principal towns and cities are Madikeri, Chikmagalur, and Somashekara, with a population of around 30,000. Other significant towns are Kappad and Somashekara.

The Department continued to lay emphasis on improving health care facilities, upgrading AYUSH Educational standards and also creating awareness about AYUSH. Govt of Karnataka has taken initiative in mainstreaming of AYUSH in National Health Care under NRHM in right earnest. The AYUSH systems are time-tested methods to tackle life style disorders which are becoming a major threat to health in present era.

We built the website, the document/ enquiry process for people interested in renting places managed by them. We focused on educating people about possible options in renting. SEO standards are very important as the competition in the property renting space is extreme. As their target demographic is young and impatient, we also showcased certain properties on youtube. This would also assist with sales.
